Tugas 2

The screenshot shows the NetBeans IDE interface with the following details:

- Title Bar:** MODUL12 - NetBeans IDE 8.0.2
- Menu Bar:** File, Edit, View, Navigate, Source, Refactor, Run, Debug, Profile, Team, Tools, Window, Help
- Toolbar:** Standard NetBeans toolbar with icons for file operations.
- Project Explorer:** Shows a project named "MODUL12" containing modules like "B4911", "Booking Lapangan Futsal", "Futsal", "Lahan", "modul10", "modul12", and "Source Packages".
- Code Editor:** The main window displays the source code for "tugas2.java". The code includes imports for java.awt.Color and javax.swing.JFrame, and defines a class "tugas2" that extends JFrame. It contains methods for handling action events (hijauActionPerformed, merahActionPerformed, kuningActionPerformed) which change the background color of the content pane. It also includes a main static void main method that sets the Nimbus look and feel and creates the form.
- Navigator:** Shows the members of the "tugas2" class, including its constructor and various event-handling methods.
- Status Bar:** Shows the date and time (20.26 INS).
- System Tray:** Shows various system icons at the bottom of the screen.

The screenshot shows the NetBeans IDE interface with the following details:

- Code Editor:** The main window displays the source code for "tugas2.java". The code is identical to the one in the first screenshot, defining a class "tugas2" that extends JFrame and handles three radio button selection events (hijauActionPerformed, merahActionPerformed, kuningActionPerformed) to change the background color of the content pane. It also includes a main static void main method that sets the Nimbus look and feel and creates the form.
- Navigator:** Shows the members of the "tugas2" class, including its constructor and various event-handling methods.
- Status Bar:** Shows the date and time (20.26 INS).
