

The screenshot shows a Java development environment with a dark theme. On the left is the Explorer sidebar, which lists two open files: 'Program.java' and 'Roti.java'. The main area contains a code editor with the following Java code:

```
public class Program{
    public static void main(String[] args){
        System.out.println("Hello Word");
    }
}
```

To the right of the code editor is a terminal window titled 'cmd.exe' running on 'Microsoft Windows [Version 6.1.7601]'. It displays the command-line output of the Java program:

```
C:\Windows\System32\cmd.exe
Copyright (C) 2009 Microsoft Corporation. All rights reserved.
D:>javac Program.java
D:>java Program
Hello Word
D:>
```

The status bar at the bottom of the interface shows the encoding as 'UTF-8', the line separator as 'CRLF', and the current file as 'Java'. The system tray icons indicate the date as 13/09/2019 and the time as 15:26.
